**Chassis Systems Ltd chooses Lighthouse Systems' Shopfloor-Online for SPC data collection automation and reporting**

---

London, UK – September, 2007 – Lighthouse Systems Ltd, a leading provider of shopfloor data collection software, announces that Chassis Systems Ltd has chosen its Shopfloor-Online Web based SPC software to automate its data collection and SPC reporting at its Telford plant.

Chassis Systems Ltd is a joint venture between GKN/Dana Corp providing chassis to Land Rover and Range Rover. The company required a solution to meet its current and future data collection requirements and these are more than met by Shopfloor-Online.

Shopfloor-Online is a Web based Shopfloor Data Collection solution designed for use by manufacturers looking to collect real time information about their process.

**About Lighthouse Systems**

Lighthouse Systems is an international software company with European headquarters in London, England, and USA headquarters in Rochester, NY and Asia headquarters in Singapore.

Lighthouse develops and markets software for the Manufacturing Execution Systems marketplace covering applications like Quality, SPC, Downtime, OEE, Traceability and Maintenance Management. Customers include Nissan, Rexam, Toyota, Constar, Crown and Airbus.
