

Real time information for Quality and Production Management

Novapak Corporation selects Shopfloor-Online for SPC data collection

Solution to streamline data collection, data retrieval and analysis

Rochester, NY – March, 2008 – Lighthouse Systems, a leading provider of shopfloor data collection software, announced that Novapak Corporation has selected Lighthouse Systems' Shopfloor-Online™ to automate their SPC data collection and reporting for their 5 production facilities in the United States.

Data collection and documentation is a key function in Quality Assurance. Data serves the need to control processes internally, provide proof to customers the processes are controlled and manufactured to specification, and to build historical benchmarks for analyzing trends and failures.

Shopfloor-Online will provide Novapak with a true SPC quality control system that will streamline data collection and offer powerful statistical analysis tools. Shopfloor-Online will generate Certificate of Analysis reports satisfying the most demanding customer requirements.

About Lighthouse Systems

Lighthouse Systems is an international software company with offices in Rochester, N.Y.; London, England and Singapore. Lighthouse develops and markets software for Statistical Process Control and the Manufacturing Execution Systems marketplace. Blue chip customers include Alcan Packaging, Rexam PLC, Toyota, Constar International, and Nissan. For more information please visit: www.LighthouseSystems.com.

About Novapak

Whether you need millions of stock blow molded containers, thousands of highly custom, technical blow molded parts, or anything in between, NOVAPAK can provide the precise blow molded product you need to compete successfully in your marketplace while meeting your schedule and cutting your costs.

One of the nation's largest blow molding organizations, NOVAPAK's production has grown consistently from 3 million in 1969 to more than a billion containers and technical parts today-in all popular resins including PET, HDPE, MDPE, PP, and PVC. For more information, please visit www.pvcc.com.
