Leading packaging company selects Lighthouse Systems' Web Enabled SPC for data collection across multi-site operations

Rochester, NY – February, 2006 – Lighthouse Systems Inc., a leading provider of shopfloor data collection software, announced that a leading packaging company has selected Lighthouse's Shopfloor-Online™ Web Enabled SPC software to capture, chart and report on SPC data within their multi-site organization.

Lighthouse Systems' Shopfloor-Online™ was selected because of the best in class functionality and the ease of use that Shopfloor-Online brought to the users and the reporting flexibility provided to senior management. The ability to capture and report data by cavity for multi-cavity molding was a very important component of the selection criteria requirements.

Shopfloor-Online™ is a Web-Enabled Shopfloor Data Collection solution designed for use by manufacturers looking to collect real time information about their process.
