

Press Release
Visy Beverage Announcement
April 2008

Visy Beverage standardises its manufacturing systems on Lighthouse Systems' Shopfloor-Online

Proven track record across multiple continents and strong product functionality put Shopfloor-Online at the heart of international packaging and recycling giant

Visy Beverage announces that it has selected Shopfloor-Online from Lighthouse Systems Ltd as its standard solution throughout its manufacturing plants across Australasia. Shopfloor-Online will be used for all quality data collection at the plant level and will also provide the centralised corporate reporting that is so essential to the management of the business.

Mr Manek Irani, Divisional Quality Manager for Visy Beverage, says "This is a massive implementation and the decision process that we undertook was long, complex and far-reaching. Our requirements were diverse and needed to be met at a plant and a corporate level, while satisfying a broad set of processes across the different business units. We were also being encouraged to find a solution that fitted with our corporate IT strategy where centralised servers are preferred.

Manek continues, "After some tough scrutiny we selected Shopfloor-Online from Lighthouse Systems. Not only does Lighthouse have a particularly strong product offering but they also have a proven pedigree in our sectors. Their existing customer base is strong and subsequent reference visits to several of their customers across three continents were enough to convince us that Lighthouse was the right partner to work with."

Roll out of Shopfloor-Online within the Beverage Division is now underway and is expected to be completed by Dec 2008.

About Visy Beverage

Visy Beverage is a division of Visy, established in Melbourne, Australia in 1948. It has grown to become the world's largest privately owned packaging and recycling company and now employs more than 8,000 people in Australia, New Zealand, and the USA.
